

## ***To all clients receiving Indigenous COVID Relief Support.***

### **IMPORTANT!**

We are developing a new eligibility form and process to be implemented in the very near future.

**This opportunity is for those that identify as FNMI from the Indigenous community. You will be required to fill out this form and meet criteria before support may be available to you.**

Any clients entering or currently in the Emergency Motel-Shelter Program please be advised that maximum amounts and time of stays will be imposed to ensure we can continue to offer this service through the winter months- specifically to those that have not yet utilized this support. Please understand you may be cut-off from extensions on your accommodations, so it is imperative that you be actively involved in housing search. Folks receiving long term (over two months) motel support may be notified of termination of their sponsorship.

We have made it very clear that this subsidy is meant to be temporary and short term while folks continue in their search for stable rental housing options. You may also be asked to provide ongoing proof of your search efforts to be eligible for the COVID Relief Support at Carea. You will be asked to engage with other agencies and services in the area to ensure you are proactive and aware of, and taking advantage of, any available supports.

**NOTE: You may apply for rent subsidy for first or last months rent to secure a place through this program and will be asked to submit necessary information to be considered.**
